

# WHERE CAN GEOGRAPHY TAKE YOU?

TAKE  
YOUR  
PLACE

## NOT YOUR USUAL 'CAREERS TALK'!

Hosted by **Kit Marie Rackley**, neaco Higher Education Champion, a geographer, educator, writer and podcaster.

The call for more sustainable living and working has only become louder and Geography related subjects have never been more relevant. While jobs that work on the environment and sustainability are obvious pathways, you may be surprised how many doors Geography related subject can open. In this live webinar, join neaco Take Your Place and the Geographical Association to explore an overview of the different university and non-university pathways you can take after school.

- Is this Geography related? A snapshot of the kind of jobs and courses that Geography can prepare you for.
- Geography is everywhere at University – how a range of undergraduate courses have links to it
- What are 'apprenticeships'? Are there any in the 'green sector'?
